TH PRESSURE SENSITIVE TAPE HEAD

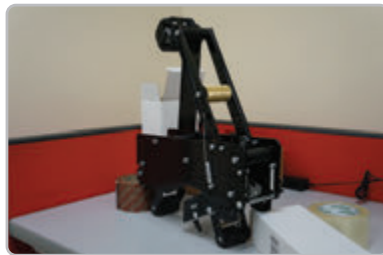

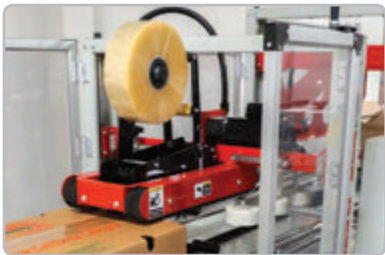

The TH – Tape Head is BestPack's oldest pressure sensitive tape head that is still in use with a long proven track record. The TH – Tape Head was the very first tape head in the carton sealing industry to offer an adjustable tab length. It is still used in some limited short tab and a few agricultural carton sealer applications. It is also used as a replacement tape head for very old BestPack carton sealers that are still being used.
